

Cp Graphics - Giclee Pricing Sheet 2008 • Phone 615-293-5518

Your giclees are made with the highest quality materials: archivability of up to 100 years can be expected according to accelerated aging tests. We allow 2 inch borders at no additional cost for canvas.

High resolution digital capture: \$50 each image (only if a proof is ordered), if proof is not ordered the digital capture is \$75 per image. We try to match the color exactly as much as possible, but through the printing process an exact reproduction is not possible.

IMAGE SIZE (We add in addition to the image size about 2" around for canvas and 1" for watercolor at no additional cost)

Digital files supplied by the customer to us: Color correction and minor retouching are billed at \$25 per quarter hour. Note: we do not charge for time spent correcting color if the digital file supplied is well prepared and does not present particular challenges with out of gamut values. An estimate will be provided prior to starting a print job..

We can print any size not listed above up to 42" (with an additional 1" border around) in paper width with up to 38 feet on the other dimension. The prices in the tables above are for common sizes. If for example a 30X30" print is ordered (which is not listed below), we will quote a price equivalent to a same similar size giclee. Please e-mail us for a quote. We also have a giclee FAQ page.

Note: quantity discounts listed above apply to multiple giclees of the same file.

UV coating: \$2 per square foot. We can apply a UV and scuff resistant satin coating to canvas. An average shrinkage rate of 0.6% may be present on unstretched canvas. This very slight shrinking is normal and expected due to the natural fiber properties of the canvas. When stretching, most or all of the shrinkage (depending on an individual's stretching technique and air moisture) will disappear. Canvas coating is a must. If you prefer to overpaint the giclee, we will ship uncoated canvas. Please apply a coating after the paint is dry.

Epson PremierArt™ Canvas (Polyflax/Cotton). Premium canvas, instant dry water resistant with a high resolution coating. Wide color gamut ideal for all demanding applications. This canvas is the choice for the highest image quality and archival requirements.

Note: When we make giclee prints of your artwork we have no way to verify copyright. We assume the client is the rightful creator/owner. Cp Graphics will not assume any responsibility for copyright issues
